SS-304L

SS-304L is austenitic stainless steel is an economical and versatile corrosion resistant alloy suitable for a wide range of general-purpose applications. Its chemical composition corresponds to UNS S30403 for use in additive manufacturing processes. Vacuum Induction Melting - Inert Gas Atomization process is used at INDO-MIM for manufacturing of powder. Our unique ASB technique improves powder sphericity, which enhances flowability in achieving consistent density and uniform build rates.
